## **PROFILE**

I am a talented and hard-working technologist driven by a desire to create unique, exciting things. Throughout my 8+ year career in technology, I've had the fortune of working on some amazing projects. From Coca-Cola video mash-up widgets to Nike and Converse product customization software, I've made things that both inspire creativity and increase business profits. As a developer, my strengths are front-end web standards, responsive and adaptive design and ActionScript, though I strive to be language-agnostic and able to pick up the best tool for any given project. As a team leader, my broad range of experiences in video production, visual design and user experience help me to facilitate communication within multidisciplinary teams, resulting in cohesive processes and ultimately high-quality work.

## **EXPERIENCE**

### **Technical Team Leader:** *R/GA, New York, NY (08/2012 - Present)*

Assisted on strategic planning and co-facilitated business development workshops. Managed client and tech partner relationships, and a development team for the redesign of the Converse e-commerce website. The resulting prototype from this scope of work has since been used throughout the company as a standard for responsive and adaptive design.

### **Senior Open Standards Developer:** *R/GA, New York, NY (08/2011 - 08/2012)*

Lead developer on projects that range from the HTML5 video web app portion of an in-store retail installation, to e-commerce websites with innovative features such as a mobile shoe customizer and an inline PDP.

### **Flash Developer:** *R/GA, New York, NY (04/2010 - 08/2011)*

Worked on all-Flash e-commerce websites for high-profile clients, adding enhancement features and making performance optimizations. Developed highly innovative projects such as the Nike Team Sports uniform builder. Have also spear-headed the use of functional prototypes for pitches.

### **Senior Flash Engineer:** *Mediatronica, Inc., New York, NY (10/2006 – 04/2010)*

Built customizable, XML driven user interface systems that generated sharable, branded Flash widgets with features revolved around gaming, web cameras, video, audio, and multi-user functionality. One notable application of this system let users rhythmically trigger video clips with their keyboard. The first iteration of this remix/mash-up tool, branded for the band Innerpartysystem, was nominated for a Webby in 2009.

### **Freelance Flash Developer:** *New York, NY (05/2006 - 03/2009)*

Developed educational games for sites which include ShelSilverstein.com and MouseCookieBooks.com. Commissioned to build software for a kiosk game that teaches kids about the stock market, which is now on permanent exhibit at the Children's Museum of Houston. Have developed various interactive maps, utilizing APIs such as Google Maps and Papervision3D.

### **Teacher's Assistant:** *Advanced Education System, New York, NY (02/2006 - 08/2006)*

Assisted in lectures and one-on-one training for a pilot program aimed at inspiring High School teachers to learn technology and incorporate it into their standard curriculum.

### **Web Developer/Graphic Design/Print Production:** *Vertrue, Inc, Stamford, CT (8/2003 - 7/2004)*

Created original web logo designs, and also built animated ad banners in both HTML and ActionScript 1.

## **EDUCATION**

### **MPS Interactive Telecommunications Program**

New York University - Tisch School of the Arts 09/2004 - 05/2006

### **BFA Graphic Design**

University of Massachusetts Lowell 09/1999 – 12/2003

## **SKILLS**

### **Management Skills**

Scrum master	Client and partner relationships
Source management: SVN, Git and Mercurial	On-boarding and documentation
Task management: Fogbugz and JIRA	Agile methodologies

### **Developer Skills**

HTML	ISML
CSS	Demandware Script
Sass	ActionScript 3
Compass	Server-side ActionScript
Javascript	Papervision3D
JQuery	Greensock
XML	Google Maps API
JSON	YouTube API

### *Other languages*

PHP	Arduino
MySQL	Android
Processing	C++

### **IDEs and Other Tools**

Sublime Text	Dreamweaver
Eclipse	Flash
Charles Web Proxy	Flash Builder
XAMPP	Tortoise

### **Other Skills**

Photoshop	Premier
Illustrator	Blender
Final Cut Pro	Adobe Media Encoder
